PROFILE

Product Manager who takes 0-1 product areas from ambiguous problem to shipped experience. Ships agentic AI systems at Flipkart as a technical peer to data scientists and AI engineers across prompt engineering, evals, and failure modes. Holds a high bar on product craft.

EDUCATION

Indian Institute of Technology (IIT) Delhi 2020 - 2024

B.Tech, Chemical Engineering · Minor in Design · Specialisation in ML & Statistics · CGPA: 7.6/10

JEE Advanced: top 99.97 percentile (AIR ~5,500) · Class X: 95.5% · Class XII: 93%

EXPERIENCE

Flipkart India Pvt. Ltd. | **Product Manager, AI Mode** Jul 2025 - Present

Owns agentic AI products in Flipkart's new AI commerce layer, from blank doc and market hypothesis to shipped experience.

- **AI Mode Relevance:** Improving the quality of results AI Mode shows by raising recall, improving ranking, rewriting queries into better searches, and prioritizing which constraints to hold firm on when a query can't be fully met.
- **Flipkart Food (0→1):** Led market entry for Flipkart's food venture, running funnel instrumentation, focus groups, and user interviews to pinpoint drop-off drivers and identify price ambiguity and intent mismatch as primary friction points for mid-affluent Indians.
- **Agentic Payments (UAP):** Partnered with NPCI to integrate the Unified Agentic Protocol into AI Mode chat, building an end-to-end workflow where the agent autonomously executes UPI payments via tool calling once intent resolves, within configurable guardrails.
- **Voice-Triggered Instant Purchase:** Designed the full agentic pipeline, from voice and text intent capture through context-window-aware inventory resolution to UAP payment execution on confirmation, managing latency budgets to stay sub-second from intent to purchase.

APM II - SLAP & StyleDrops (GenAI) Jul 2024 - Jun 2025

SLAP (Shop Like A Pro): 0-1 conversational commerce app. StyleDrops: 0-1 GenAI fashion try-on on SLAP, offering photorealistic try-ons on lifelike avatars to solve static imagery as a core discovery friction.

- Designed a GenAI try-on engine with automated eval pipelines, resolving facial drift and pose mismatch to cut latency by 90% and raise facial consistency accuracy from 0.34 to 0.97.
- Ran automated eval pipelines across Google, ByteDance, Fal.ai, and Replicate, structuring cost, latency, and accuracy trade-offs to cut evaluation cycles by 30x.
- Built a Gemini agent with live inventory tool calling to replace a model that was 67% inaccurate, lifting accuracy to 95-99% and winning 9/10 user preference across 500+ A/B tested users.
- Designed a cost versus latency trade-off framework for avatar reuse and regeneration, cutting avatar generation cost by 66% while preserving personalization freshness.
- Built a catalogue intelligence layer and failure mode aware archetype ranking for zero history users, cutting manual curation 80%.

APM I - Promotions & Offers Platform Jul 2023 - Jun 2024

Built promotions infrastructure powering ₹100Cr+ in bank deals, seller subsidies, and platform burn at BBD scale.

- Centralized bank agreements, automated eligibility and opt-ins, and dynamically allocated burn across sellers, banks, and platforms via a config-driven system, replacing manual email and spreadsheet workflows to cut operator effort 70%.
- Redistributed offer burn from entrenched users via an Either-Or framework and unified fragmented surfaces into a single Net Effective Price, contributing ~₹700Cr in GMV.

SELECTED INTERNSHIPS

i3 Digital Health, Switzerland (Oncology SaaS) | **Product Manager** Apr - May 2023

- Launched a patient portal and resolved over 100 pain points through structured user testing across engineering, design, and ops.

Dr. Reddy's Laboratories | **Data Science Analyst · PPO offered** May - Jul 2023

- Used Support Vector Regression to re-engineer parallel processes, boosting productivity 52% and cutting cycle time 40%.

STEPapp / PACE Academy (Ed-Tech) | **Product & BizDev** Jun - Jul 2022

- Shipped a progressive web app MVP in three weeks, growing daily active users by 3x.
- Wrote a ₹200Cr B2G proposal to pursue new market opportunities.

SKILLS & TOOLS

AI / LLM: Agentic AI systems, prompt engineering, eval pipelines, model selection, context windows, tool calling, cost-latency-accuracy trade-offs, LLM product design, ranking & recommendation

Data: SQL, Python, funnel analytics, cohort analysis, A/B testing, success metric definition (L0/L1), event instrumentation

AI Tools: Claude Code, Gemini API, Cursor, used daily for sourcing, research, and analysis, not just aware of them

Product: 0→1 product strategy, user research, spec writing, investment thesis framing, market sizing, moat analysis, scaling

Domains: Consumer internet, agentic commerce, fintech & payments, GenAI applications, marketplaces, SaaS

AWARDS & LEADERSHIP

- 2nd runner-up at Graphite GTC No-Code Revolution among 3,000+ participants, Tryst IIT Delhi 2022.
- Led Cosmicon, IIT Delhi's first Physics & Astronomy Club fest, as Coordinator: 2,500+ participants, 15+ events.
- Closed Hero, Decathlon, and Red Bull sponsorships as Marketing Coordinator, Inter-IIT Sports Meet (23 IITs, 2,000+ athletes).

Interests: Self-taught drummer · Trekking & mountains · Sports & board games
